

SOP 1024 Site in Selima Oasis

Techno-Typological Study of Lithic Materials

Master Thesis for obtaining the Master Degree
in "Environmental Archaeology" from Egyptology Department

By

Nader El-Hassanin

under supervision of:

Dr. Abou Al-Hassan Bakry

(Cairo University)

Dr. Friederike Jesse

(Cologne University)

ACKNOWLEDGEMENT

I would first like to thank my thesis advisors Prof. Abou Al-Hassan Bakry of the Faculty of archaeology at Cairo University and Dr. Friederike Jesse of “Forschungsstelle Afrika” of the Institute of Prehistory at Cologne University. The doors to Dr. Bakry and Dr. Jesse offices were always open whenever I ran into a trouble spot or had a question about my research or writing. They consistently allowed this thesis to be my own work, but steered me in the right direction.

I would also like to thank the scholars who were involved in the review of the archaeological survey of this research: Dr. Heiko Riemer from Cologne University, Dr. Karin Kindermann from Cologne University, Prof. Olaf Bubenzer head of the geographical institute at Cologne University, Dr. Hubert Berke, Dr. Nadja Pollath and Jan Kuper. Without their passionate participation and input, the validation survey could not have been successfully conducted.

I would also like to acknowledge Dr. Rudolph Kuper at Cologne University and Prof. Fekry Hassan at University College London as the second readers of this thesis, and I am gratefully indebted to them for their very valuable comments on this thesis.

Finally, I must express my very profound gratitude to “Forschungsstelle Afrika” of the Institute of Prehistory at Cologne University where I found a great support, to my family and to my colleague El-Shaimaa Taha, Mohamed Gamal, Prof. Ola Al-Aguizy and Prof. Tarek Tawfik for providing me with unfailing support and continuous encouragement throughout my years of study and through the process of researching and writing this thesis. This accomplishment would not have been possible without them.

Thank you

Nader El-Hassanin

CONTENTS

1. Introduction	5
2. Selima Oasis and its Regional Context	8
2.1 Geographical and Geological Setting of Selima Oasis	8
2.2 Climatic change and Settlement History of Selima Oasis and Its Regional context during the Early to the Middle Holocene	12
2.2.1 Climatic history	12
2.2.2 Early to Middle Holocene Occupation at Selima Oasis and its Surroundings	16
2.3 Archaeological work in Selima Oasis	20
3. SOP 1024 Site	23
3.1 The Archaeological Materials	23
2.1.1 Pottery	
2.1.2 Faunal remains	
2.2 Dating	32
4. Lithic analysis	33
4.1 Methods of Analysis	33
4.1.1 Excavation units	33
4.1.2 Lithic Analysis	34
4.2 Raw Material	36
4.3 Debitage	40
4.3.1 Definition	40
4.3.2 Debitage analysis	42
4.4 Cores	49

4.5 Tools	58
4.6 Chaîne Opératoire and Lithic Concept	67
5. SOP 1024 in the Regional Context	71
5.1 Techno-Typological Parallels	73
5.1.1 AL Jerar & Ruat El Ghanam Phases vs SOP 1024	74
5.1.2 Djara B vs SOP 1024	78
5.2 Regional Remarks	79
6. Conclusion	80
7. Summary	88
8. Arabic Summary	87
9. Abbreviations	90
